

<b>Abramowicz</b> Victor	Indian naval policy and the naval weapons acquisition process.
<b>Arends</b> Catherine	Analysis of landscape of the Roman military occupation of Egypt, and examination of the changing relationship between the principal agents of Roman colonialism and the physical environment (both built and natural).
<b>Barbour</b> Helen	Use of transplanted olfactory ensheathing glial cells in the treatment of spinal cord injuries.
<b>Coall</b> David	The practical utilisation of longitudinal databases to research.
<b>Connolly</b> Joan	Investigations of the magnetic properties of cobalt nanoparticles in silicone based fluids for the treatment of eye disease.
<b>Court</b> Naomi	Developmental regulation of stress-activated protein 3 (SAPK 3) expression.
<b>Creamer</b> Jonathan	Chemiluminescence of luminol as a presumptive test for the presence of blood to estimate the age of bone samples for forensic and archaeological purposes.
<b>Fink</b> Joshua	The role of protease activated receptors in the lung pathology of cystic fibrosis.
<b>Flavel</b> Tamara	Interactions between the compost and soil biological factors such as microbe populations, organic matter and nutrient cycles and relating how these affect yields from horticultural soils.
<b>Forbes</b> Vanessa	A study of estuarine food web interactions using stable carbon and nitrogen isotopes.
<b>Goh</b> Su San	Bacteriophages of <i>Clostridium difficile</i>
<b>Graham</b> Sharyn	The Bugis, the largest ethnic group in South Sulawesi, and their notions of gender.
<b>Grassi</b> Michelle	Application of a unique 'polymer mat' delivery system to the in situ remediation of tetrachloroethene contaminated groundwater
<b>Grasso</b> Darren	Superstring theory: a promising candidate to provide a quantum description of all four fundamental interactions including gravity.
<b>Herriman</b> Nicholas	The killings of sorcerers in East Java, in their social, cultural and political context.
<b>Kendrick</b> Tulene	Characterisation of activation of the JNK MAPK pathway for granulocyte colony stimulating factor.
<b>Kershaw</b> Alison	A biography of Thomas Traherne, 1637-1674 poet, priest and mystic.
<b>Lam Chen-Fuh</b>	Acute respiratory distress syndrome (ARDS).
<b>Mast</b> Natalie	Beyond Left and Right? The evolution of the party system in the European Parliament.
<b>McDiarmid</b> Tracy	Changing depictions of the Second World War in British films.
<b>Mellough</b> Carla	Regenerative capacity of the adult mammalian nervous system after neural injury.
<b>Midgley</b> Daniel	Construction of an intention recognition system (as opposed to speech recognition) specifically by using machine learning techniques to recognise acts in dialogue.
<b>Miles</b> Lauren Elisha Claire	Potential negative effects of gonadotropin-releasing hormone, used extensively to treat reproductive disorders and to inhibit the growth of hormone dependent cancers, on cell proliferation.
<b>Miller</b> Julienne Lee	The extent to which adaptive learning has been ignored as a valid organisational learning technique.
<b>Mills</b> Kristina	Characterisation of $\alpha$ -amylase enzymes, which are allergens of house dust mites.
<b>Nicholls</b> Rochelle	Equipment design in baseball and related risk of impact injury to infield players.
<b>Ouaggini</b> Catherine	Questions of language and identity for contemporary writers in exile writing in French.
<b>Payne</b> Estelle Marjorie	The role of transactive memory systems in group-level innovation, creativity and learning.
<b>Peake</b> Helen	Interaction between respiratory epithelium alveolar macrophages, and commonly inhaled allergen-containing particles in asthma.

<b>Pelham</b> Janelle Toni	Identification of which of the DNA (cytosine-5) methyltransferase enzymes play a role in neoplastic transformation.
<b>Quaghebeur</b> Mieke	Phosphate and arsenate: exploration of their interactions in plants and soils.
<b>Rayment</b> John	The secondary and tertiary structure of a membrane protein that forms a mechanosensitive ion channel in the thermophilic archaeon <i>T.acidophilum</i> .
<b>Riddell</b> Katrina	Islam prevents the securitisation of population growth in local level debate: study case study of Pakistan and Iran.
<b>Sharma Acharya</b> Shambhu Sagar	Characterisation of cyclic behaviour of cemented calcareous soils.
<b>Shiell</b> Glenn	A comparison of life history differences between two species of sea cucumber endemic to Western Australia with a view to the development of a commercial aquaculture method.
<b>Sikorska</b> Joanna	Condition monitoring of mechanical seals using acoustic emission-set up data collection systems at two NASA facilities in the US.
<b>Smith</b> Jeremy	Changes in estrogen concentrations may regulate leptin and leptin receptor expression during puberty and pregnancy.
<b>Spillman</b> Claire	A modelling assessment of clam and mussel dynamics in Barbamarco Lagoon, Italy
<b>Taylor</b> Nicholas	Mechanism of environmentally induced inactivation of glycine decarboxylase to produce plants that can survive in harsh environmental conditions, such as salinity, drought, flooding, cold or heat.
<b>Thomas</b> Meghan	Brain repair using neural stem cells differentiated with the developmental gene Pax 7
<b>Tilbury</b> Amanda	Use of lipid chemistry to track the biomass and structure of the microbial community in industrial residue lakes
<b>Wilson</b> Thomas	The theme of nature in the writings, fictional, non-fictional and poetic of John Fowles.
