

ALBERTH

An analysis of the morphology, syntax, and discourse functions of the passive voice in Wolio, an indigenous language of Southeast Sulawesi, Indonesia.

ANDREW ANGUS

The oboe sonatas of Italian composer Giuseppe Sammartini (1695 to 1750)

KATHERINE APTED

The changing relationship between nationalism and local identity in Nusa Tenggara Barat, Indonesia: a village study.

STUART ATKINSON

Space-time variability of runoff and soil moisture: Mahurangi Catchment, New Zealand

DINO BUSULADZIC

Application and testing of existing and new ideas within a real Bosnian minefield environment.

JOHANNA CILLIERS

Winding up of group companies: the search for an equitable solution in Australia

DANIEL DALEY

Complementation analysis of respiratory-deficient, temperature-sensitive yeast mutants to identify factors involved in the assembly of respiratory chain proteins in plants

CHRISTINE EMERSON

A social and economic analysis of replacing diesel generators with solar/wind hybrids in remote Aboriginal communities in the Kimberley

NORIKO HAGIWARA

Motherhood ideology in Japanese society, and explore how this ideology affects the consciousness and everyday life of educated women.

JIAN ZHONG HE

A model of the Atmospheric Planetary Boundary Layer (APBL) which is important in energy conversion processes between air-sea and air-land.

ELYSIA HOLLAMS

A cell-free mRNA decay system to study posttranscriptional regulation of EGF-receptor gene expression

ANDREW HOUSE

Behaviour of suction anchor foundations for off-shore structures during installation and their response to various loading conditions.

WEN HUA HUANG

Toward understanding the underlying mechanism of modulating effects of immunosuppressive on liver transplant tolerance

TANIA JACKSON

Biochemical mechanisms behind the mode of action of the fungicide, phosphite

GRACE JEZIERSKI

Genetic assessment of threatened species *Leucopogon obtectus* (Epacridaceae) including study of genetic diversity and mating systems

JANET KAPETAS

Chinese migration to South Australia and the history of Kapunda, South Australia

RICHARD KOVACICH

Enhancement of optical-frequency comb generation using four-wave mixing in laser diodes

YVONNE LAI

Study of adeno-associated virus-mediated gene transfer into the retinal pigment epithelium

LAURIE LAMBERT

Support to determine the effect of various types of menopause and use of hormone replacement therapy on risk of coronary heart disease

CRAIG MACFARLANE

Use of carbon isotope discrimination for studying the ecophysiology of forests subject to soil and atmospheric drought

MICHAEL MCDONALD

The use of wild wheat relatives as novel sources of germplasm for increasing waterlogging tolerance in bread wheat.

ELISE MENGLER

An investigation of the auditory processing abilities of specifically language impaired children using electrophysiological measures

SANDRA PEREIRA

Up-to-date results on spatial clustering and spatial statistics, in particular on Markov Chain Monte Carlo methods

JULIANNA PRISKIN

Establishing an integrated framework for the sustainable planning and management of resources for a nature-based tourism industry in coastal environments: the case of the central coast region of Western Australia

SPENCER PROCTOR

How cholesterol sourced from the diet can initiate heart disease

WENDY ROBERTSON

DNA:DNA homologies of sulphate-reducing bacteria isolated from a gasoline-contaminated aquifer in Perth

STEWART SAUNDERS

Evaluation of the hypothesis that the brain utilises a language-like representational system in order to carry out 'high level' thought processes

NEIL SOMERS

Structural chemistry of copper(1) halide bidentate, group 15 Lewis base adducts

KIRSTY SPALDING

Cell death of central nervous system neurons following trauma

MICHAEL VAN MAANEN

The role of private military advisory firms in low-intensity civil conflict
